- If equipped, the message center will display the front left (LF) tire.

# 2

## To Rest TPMS Sensors

1.Starting relearn process from left front tire, point antenna on correct position. Press & release power button. Once the speaker chirped, move to the next tire.

2.Follow this order to rest TPMS sensors: Front left, front right, rear right, rear left.

3.After all sensors reseted, the car horns twice means TPMS re-learn finished.

## Tips for user:

1.Please make sure antenna fit in CORRECT position.

2. Please make sure the 9V battery is with enough power.

Note: Battery not included

3. Sensors should be original OEM sensors which well programmed.
