 6. Ignition goes from OFF position to RUN position 3 times and ends at RUN position.
 7. Horn will ring once and TPMS indicator flashes, then learning mode has been entered successfully.
- If equipped, the message center will display the front left (LF) tire.

2

To Rest TPMS Sensors

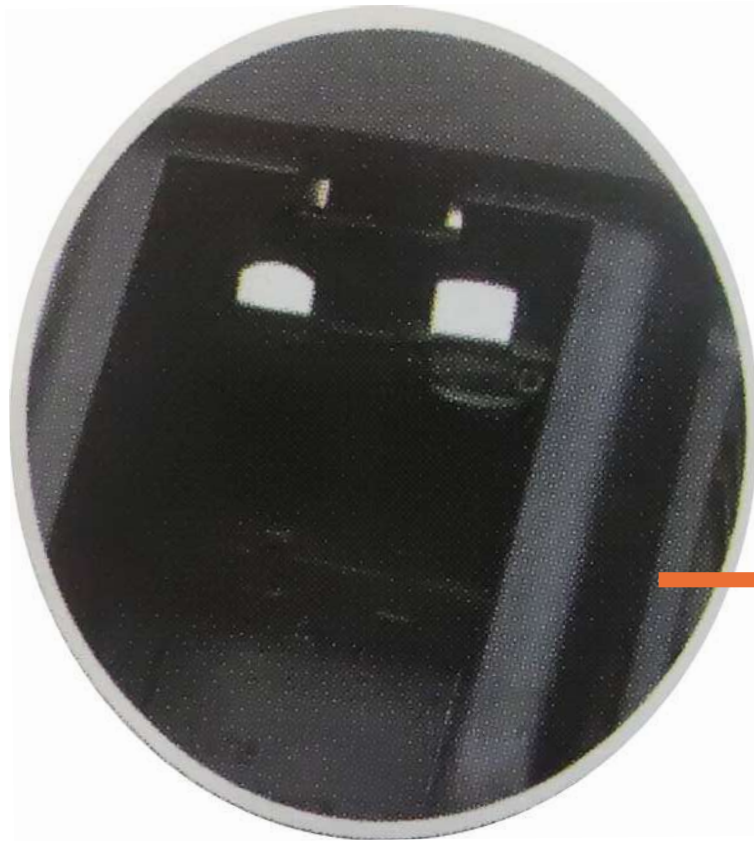

1. Starting relearn process from left front tire, point antenna on correct position. Press & release power button. Once the speaker chirped, move to the next tire.
2. Follow this order to rest TPMS sensors: Front left, front right, rear right, rear left.
3. After all sensors reseted, the car horns twice means TPMS re-learn finished.

Tips for user:

1. Please make sure antenna fit in CORRECT position.

2. Please make sure the 9V battery is with enough power.

Note: Battery not included

3. Sensors should be original OEM sensors which well programmed.
